	Monday July 15th	Tuesday July 16th	Wednesday July 17th
9:00-10:30	9:00-9:15 - Registration - 9:15-9:30 - Welcome	Biomechanics - Chairs: Laura Baumgartner, Elham Alizadeh	Entrepreneurship & Innovation I - Proposed Chairs: Nuria Brunet, Javier Santamaria
		9:00-9:25 - BT 06 - <b>Sandra Eizaguerri Gallardo</b> - Analyzing the influence of bone changes on the knee bone-cartilage interface during galt using finite element models	9:00-9:25 - BT 33 - <b>Ariadna Plans Bellavista</b> - Efficient Healthcare Resources Management in ASSIR: Powering Coordination for Quality Success in the Centres de Sexe i Reproducció de Catalunya
	9:30-10:30 - Opening Conversation - <b>Zina Jarrahi Cinker</b> , PhD, Director General MATTER, Creator PUZZLEX Barcelona	09:30-09:55 - BT 07 - Marc Torres Vila - Model validation of Subperiosteal Implants (SI) with Finite Element Analysis (FEA)	9:30-9:55 - BT 34 - <b>Ariadna Quingles Lamarca</b> - A Proof-of-Concept for the "MedTech Tiberina" Platform: Facilitating Access to Latest Catalan Biomedical Engineering Information
		10:00-10:25 - BT 8 - Natàlia Franco Monteagudo - Design of a prosthetic device for transmetatarsal partial foot amputation type	10:00-10:25 - BT 35 - <b>German Anashkin Kachalin</b> - Market analysis and prototype validation for TransCOR
10:30-11:00	Coffee	Coffee	10:30-10:55 - BT 36 - <b>Pol Guash Roig</b> - Implementation of Intellectual Property Protection Strategy and Regulatory Roadmap for TransCor: A Web-based Data Analysis Platform for Support in Clinical Decision-making in Cardiology
11:00-13:00	Signal Analysis - Chairs: Gorka Zamora, Murat Demirtas (TBC)	Neuroscience - Chairs: Demetrio Ferro, Marc Grau	11:00-11:30 Coffee
	11:00-11:25 - BT 09 - <b>Alba Pi Mas</b> - Phase and Morphology Analysis of Cerebral Blood Flow Signals for Intracranial Pressure Characterization	11:00-11:25 - BT 21 - <b>Jan Cases Gendra</b> - A Novel Biophysical Whole-Brain Model Explains Power Spectrum Alterations of Serotonergic Psychedelics Using Multimodal Neuroimaging	Entrepreneurship & Innovation II - Chairs: Antoni Ivorra, Sikha Okkath
	11:30-11:55 - BT 10 - <b>Pau Boncompte</b> - Task Engagement Modulation in the Primary Visual Cortex: A Layer and Frequency-Specific Analysis	11:30-11:55 - BT 22 - <b>Zaid Al Hakloui</b> - How synaptic transmission influences the dynamics of populations of spiking neurons	11:30 - 11:55 - BT 39 - <b>Gonzalo Plaza Arriola</b> - Neuroimaging-based machine learning estimation of biological brain age: discovering patterns of brain aging & enriching interventional trials
	12:00-12:25 - BT11 - <b>Saloa Elizondo Urrutia</b> - Prediction of Seizure Onset Zone in epilepsy patients via a network coupling measure	12:00-12:25 - BT 23 - Marcel Socoró Garrigosa - Rebalancing the depressed brain: a whole-brain computational study on the effects of external perturbations in psilocybin and escitalopram treatments.	12:00-12:25 - BT 37 - <b>Mariam Coris Errouich</b> - Feasibility analysis of a microwave- based device for the diagnosis and monitoring of Rheumatoid Arthritis
	12:30-12:55 - BT 12 - <b>Joan Prenafeta Ribau</b> - Characterization of neuronal dynamics in working memory	12:30-12:55 - BT 24 - <b>Alba Roca de las Heras</b> - A Multimodal Assessment of Freezing of Gait in Patients With Parkinson's Disease	12:30-12:55 - BT38 - Patricia Maria Barrufet Garbayo - Viability analysis of a microwave-based device for the diagnosis and monitoring of periodontitis and peri implantitis
13:00-14:00	Lunch	Lunch	13:00-13:25 - BT 40 - Núria Blanco i Quintanilla - Real-time environment monitoring for an artificial placenta system
	Cardiovascular - Chairs: Viacheslav Danilov, Gabriele Bernardino	Biology - Chairs: Pilar Rivera, Maria Segarra-Queralt	13:30-14:30 Lunch
	Cardiovascular - Chairs: Viacheslav Danilov, Gabriele Bernardino  14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation	Biology - Chairs: Pilar Rivera, Maria Segarra-Queralt  14:00-14:25-BT25-Samuel González Castro-Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays	13:30-14:30 Lunch Imaging - Chairs: Bart Bijnens, Gerard Martí
14:00-16:00	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics	14:00-14:25 - BT 25 - Samuel González Castro - Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and	
14:00-16:00	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation     14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagulant treatment     15:00-15:25 - BT 19 - Eva Maria Ferrer Bettran - Enhanced Prioritization and Reporting for Coronary Artery Disease Diagnosis	14:00-14:25 - BT25 - Samuel González Castro - Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseud-tissues assays     14:30-14:55 - BT26 - Paul Mihai Cozmuta Mihut - Mathematical and computational modelling of a multicellular synthetic associative learning circuit     15:00-15:25 - BT27 - Roger Torra Vaquero - Implementation of genetic circuits in Cutibacterium acnes	Imaging - Chairs: Bart Bijnens, Gerard Martí  14:30 - 14:55 - BT 13 - Esther Guillén Buisán - Assessing the viability of generating Synthetic 77 MRI scans from 37 Clinical MRI: implications for estimating brain-
14:00-16:00	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation     14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagulant treatment     15:00-15:25 - BT 19 - Eva Maria Ferrer Beltran - Enhanced Prioritization and	14:00-14:25 - BT25 - Samuel González Castro - Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays     14:30-14:55 - BT26 - Paul Mihai Cozmuta Mihut - Mathematical and computational modelling of a multicellular synthetic associative learning circuit     15:00-15:25 - BT27 - Roger Torra Vaquero - Implementation of genetic circuits in	Imaging - Chairs: Bart Bijnens, Gerard Marti  14:30 - 14:55 - BT 13 - Esther Guillén Buisán - Assessing the viability of generating Synthetic 77 MRI scans from 37 Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT 14 - Laura Martinez Pérez - Analysis and quantification of MRI sequences in a moste model with multiple sclerosis, and correlation of the results
14:00-16:00 16:00-16:30	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation 14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagulant treatment 15:00-15:25 - BT 19 - Eva Maria Ferrer Beltran - Enhanced Prioritization and Reporting for Coronary Artery Disease Diagnosis 15:30-15:55 - BT 17 - Adriana Royuela Bermúdez - Artificial intelligence-based algorithm for left ventricular hypertrophy prognosis classification using magnetic	14:00-14:25 - BT 25 - Samuel González Castro - Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays  14:30-14:55 - BT 26 - Paul Mihai Cozmuta Mihut - Mathematical and computational modelling of a multicellular synthetic associative learning circuit  15:00-15:25 - BT 27 - Roger Torra Vaquero - Implementation of genetic circuits in Cutibacterium acnes  15:30-15:55 - BT 28 - Mariana Alexandra Gomes Det Castillo - A Novel Genetic Architecture to Enhance Problotics: Integrating a Thermoinducible Bloswitch with	Imaging - Chairs: Bart Bijnens, Gerard Martí  14:30 - 14:55 - BT 13 - Esther Guillén Buisán - Assessing the via bility of generating Synthetic 77 MRI scans from 37 Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT 14 - Laura Marter Pérez - Analysis and quantification of MRI sequences in a mouse model with multiple sclerosis, and correlation of the results with a histopathology study  15:30-15:55 - BT 41 - Laura Salort Benejam - 3D reconstruction of endoscopic
	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation 14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagalant treatment 15:00-15:25 - BT 19 - Eva Maria Ferrer Beltran - Enhancem Prioritization and Reporting for Coronary Artery Disease Diagnosis 15:30-15:55 - BT 17 - Adriana Royuela Bermúdez - Artificial intelligence-based algorithm for left ventricular hypertrophy prognosis classification using magnetic resonance imaging cine sequences	14:00-14:25-BT 25-Samuel González Castro-Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays  14:30-14:55-BT 26-Paul Mihal Cozmuta Mihut - Mathematical and computational modelling of a multicellular synthetic associative learning circuit  15:00-15:25-BT 27-Roger Torra Vaquero-Implementation of genetic circuits in Cutibacterium across  15:30-15:55-BT 28-Mariana Alexandra Gomes Del Castillo - A Novel Genetic Architecture to Enhance Problotics Integrating a Thermoinducible Bioswitch with Intermediate Recombinase  Coffee  Medical Devices - Chairs: Laura Becerra, Sergio Sánchez	Imaging - Chairs: Bart Bijnens, Gerard Marti  14:30 - 14:55 - BT 13 - Esther Guillén Bulsán - Assessing the viability of generating Synthetic 77 MRI scans from 3T Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT 14 - Laura Martinez Pérez - Analysis and quantification of MRI sequences in a mouse model with multiple sclerosis, and correlation of the results with a histopathology study  15:30-15:55 - BT 41 - Laura Salort Benejam - 3D reconstruction of endoscopic tissues by unsupervised neural rendering  16:00-16:25 - BT 16 - Irene Freire Barbará - Development of Software for the Extraction of Omic Features from Badiotherapy Treatment Plans and Application
	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Atrium Post-Heart Transplantation  14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagalant treatment  15:00-15:25 - BT 19 - Eva Maria Ferrer Bettran - Enhanced Prioritization and Reporting for Coronary Artery Disease Diagnosis  15:30-15:55 - BT 17 - Adriana Royuela Bermúdez - Artificial intelligence-based algorithm for teft ventricular hypertrophy prognosis classification using magnetic resonance imaging cine sequences  Coffee  Data, Machine learning & Stratification - Chairs: Oscar Camara,	14:00-14:25 - BT 25 - Samuel González Castro - Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays  14:30-14:55 - BT 26 - Paul Mihal Cozmuta Mihut - Mathematical and computational modelling of a multicellular synthetic associative learning circuit  15:00-15:25 - BT 27 - Roger Torra Vaquero - Implementation of genetic circuits in Cutibacterium across  15:30-15:55 - BT 28 - Mariana Alexandra Gomes Del Castillo - A Novel Genetic Architecture to Enhance Problotics: Integrating a Thermoinducible Bioswitch with Intermediate Recombinase  Coffee	Imaging - Chairs: Bart Bijnens, Gerard Marti  14:30 - 14:55 - BT13 - Esther Guillén Buisán - Assessing the viability of generating Synthetic 7T MRI scans from 3T Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT14 - Laura Martinez Pérez - Analysis and quantification of MRI sequences in a mouse model with multiple sclerosis, and correlation of the results with a histopathology study  15:30-15:55 - BT 41 - Laura Salort Benejam - 3D reconstruction of endoscopic tissues by unsupervised neural rendering  16:00-16:25 - BT 16 - Irene Freire Barbará - Development of Software for the Extraction of Omic Features from Badiotherapy Treatment Plans and Application in the Creation of a Predictive Model for 6-Month Progression-Free Survival
	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Arrium Post-Heart Transplantation 14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagalant treatment 15:00-15:25 - BT 19 - Eva Maria Ferrer Bettran - Enhanced Prioritization and Reporting for Coronary Artery Disease Diagnosis 15:30-15:55 - BT 17 - Adriana Royuela Bermüdez - Artificial intelligence-based algorithm for left ventricular hypertrophy prognosis classification using magnetic resonance imaging cline sequences  Coffee  Data, Machine learning & Stratification - Chairs: Oscar Camara, Miguel Ángel González Ballester 16:30-16:55 - BT 01 - Martin Medica Lopez - Trajectory Generation Framework for	14:00-14:25-BT26-Samuel González Castro-Bacterial cellulose-based scaffolds for cell attachment: a novel approach for tissue regeneration and pseudo-tissues assays  14:30-14:55-BT26-Paul Mihal Cozmuta Mihut-Mathematical and computational modelling of a multicellular synthetic associative tearning circuit  15:00-15:25-BT27-Roger Torra Vaquero-Implementation of genetic circuits in Cutibacterium acnes  15:30-15:55-BT28-Mariana Alexandra Gomes Del Castillo - A Novel Genetic Architecture to Enhance Problotics: Integrating a Thermoinducible Bioswitch with Intermediate Recombinase  Coffee  Medical Devices - Chairs: Laura Becerra, Sergio Sánchez  16:30-16:55-BT29- Aida Jiménez Ordoñez-Electromechanical evaluation of novel cardiac resynchronisation therapy pacing techniques in an in silico left	Imaging - Chairs: Bart Bijnens, Gerard Marti  14:30 - 14:55 - BT13 - Esther Guillén Buisán - Assessing the viability of generating Synthetic 7T MRI scans from 3T Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT14 - Laura Martinez Pérez - Analysis and quantification of MRI sequences in a mouse model with multiple sclerosis, and correlation of the results with a histopathology study  15:30-15:55 - BT 41 - Laura Salort Benejam - 3D reconstruction of endoscopic tissues by unsupervised neural rendering  16:00-16:25 - BT 16 - Irene Freire Barbará - Development of Software for the Extraction of Omic Features from Badiotherapy Treatment Plans and Application in the Creation of a Predictive Model for 6-Month Progression-Free Survival
16:00-16:30	14:00-14:25 - BT 18 - Antoni Cardona Riera - Computational Fluid Dynamics Analysis of Thrombus Formation in the Left Arrium Post-Heart Transplantation 14:30-14:55 - BT 20 - Marina Ribera Pascual - Multi-scale model for simulating thrombus formation and anticoagulant treatment 15:00-15:25 - BT 19 - Eva Maria Ferrer Beltran - Enhanced Prioritization and Reporting for Coronary Artery Disease Diagnosis 15:30-15:55 - BT 17 - Adriana Royuela Bermiddez - Artificial intelligence-based algorithm for left ventricular hypertrophy prognosis classification using magnetic resonance imaging cline sequences  Coffee  Data, Machine learning & Stratification - Chairs: Oscar Camara, Miguel Angel González Ballester 16:30-16:55 - BT 01 - Martin Medoz Lopez - Trajectory Generation Framework for a Upper Limb Impairment dataset 17:00-17:25 - BT 02 - Arig Kamalmaz Zahir - Cost-effectiveness analysis of advanced therasure through	14:00-14:25- BT25- Samuel Contraiet Castro-Bacterial cellulose-based scaffolds for cell attachment: a novel apprach for tissue regeneration and peaudo-tissues assays  14:30-14:55- BT26- Paul Mihal Cozmuta Nihut Mathematical and computational modelling of a multicellular synthetic associative learning circuit 15:00-15:25- BT27- Roger Torra Vaquero - Implementation of genetic circuits in Cutibacterium acnes  15:30-15:25- BT28- Mariana Alexandra Comes Del Castillo - Anovel Genetic Architecture to Enhance Probiotics: integrating a Thermioniducible Bioswitch with Intermediate Recombinase  Coffee  Medical Devices - Chairs: Laura Becerra, Sergio Sánchez  16:30-16:55- BT29- Aida Jiménez Ordoñez - Electromechanical evaluation of novel cardiac resynchronisation therapy pacing techniques in an in silico left bundle branch block population  17:00-17:25- BT32- Nil Palomé Bartrina - Design of a thoracic arrangement of superficial electrodes to wirelessly ower implanted sensors for heart failure	Imaging - Chairs: Bart Bijnens, Gerard Marti  14:30 - 14:55 - BT13 - Esther Guillén Buisán - Assessing the viability of generating Synthetic 7T MRI scans from 3T Clinical MRI: implications for estimating brain- derived measures in Multiple Sclerosis  15:00-15:25 - BT14 - Laura Martinez Pérez - Analysis and quantification of MRI sequences in a mouse model with multiple sclerosis, and correlation of the results with a histopathology study  15:30-15:55 - BT 41 - Laura Salort Benejam - 3D reconstruction of endoscopic tissues by unsupervised neural rendering  16:00-16:25 - BT 16 - Irene Freire Barbará - Development of Software for the Extraction of Omic Features from Badiotherapy Treatment Plans and Application in the Creation of a Predictive Model for 6-Month Progression-Free Survival

Dr. Zina Jarrahi Cinker is a recognized Frontier Tech strategist, condensed matter physicist, MATTERVerse thought leader & Deep Science advocate. She serves as the Director General of MATTER, an international think tank of 30 country chapters, and Chief Creator of PUZZLE X-- the leading international event for Frontier Tech for the future--. PUZZLE X Barcelona supported by the Government of Spain, Generalitat de Catalunya, and Barcelona City Hall--, drives stakeholder dialogues among industry, governments, academia, and capital on how Frontier Technologies can shape the next chapter for cities, citizens, industries, and societies.

Dr. Cinker received a Ph.D. in Condensed Matter Ultrafast Spectroscopy from Vanderbilt University and has spent the past decade helping the materialization of deep science into technologies with broader impact. She previously served as the Executive Director of the U.S. National Graphene Association, the main organization, and body in North America with over 5,000 international members and organizations.
